

## Clinical Research Training Program

---

*RESEARCH* conducted on humans or human tissues that make use of patient data which includes study of disease mechanisms, therapeutic interventions and epidemiology is called Clinical Research which determines the safety and efficacy of medications, devices, diagnostic products and treatment regimens intended for human use. India has emerged as a global hub for clinical research. In India alone, the clinical trials market of \$300 million is expected to grow to nearly \$2 billion by 2018. A **clinical trial** is one type of clinical research that follows a pre-defined plan or protocol. There is necessity of GCP compliance Investigator, clinical research co-ordinator, clinical research assistant and other supporting staffs. Hence, there is need of additional training on regulatory, ethical and GCP guidelines.

The Clinical Research division of **Dr. Habeebullah Life Sciences (HLS)**, has expertise in ICH and GCP guidelines, handling different phases of clinical trials and department's specific training. HLS programs are very well integrated with the industry. Clinical Research course has designed to bring diverse disciplines together to address the increasing gap between "bench" research and "bedside" application and from bedside application to improved healthcare quality. Career prospects include a professional career in Clinical Research industry either as a clinical investigator, site coordinator, clinical investigations or CRO.

### Who Should Enroll

Graduates from the Life sciences, Pharmacy, Nursing, Dental, Medicine, Bio medical Engineering are eligible to join

### Course Curriculum

- Introduction to Clinical Research
- Clinical Trial Management
- Ethics in Clinical Research
- Ethical Committee Submission
- Data Management
- Types of Clinical Trials
- GCP Guideline and Regulation
- Responsibility of Clinical Trial Members
- Statistics in Clinical Research
- Monitoring and Auditing
